PROJECTS

Hill*ffair 2kl6 Website

The official website of annual cultural fest of NIT Hamirpur. November 2016 | https://hillffair.com

Designed and created the official website of annual cultural festival of NIT Hamirpur - Hill'ffair 2016. Used HTML, CSS and JavaScript in front end. Also used skrollr.js to add scroll effect to the page. It is a single page web application and has Node.js and MongoDB in the backend.

PandA

A Question and Answer forum in Node.js.

Winter 2015 | https://github.com/saurabh0402/QandA

Created a Question and Answer forum with basic functionalities like - Signup and Login system, upvote and downvote answer. Wrote the front of this web app from scratch in HTML, CSS and JavaScript. Used Node.js, Express.js and MongoDB in the backend.

YouTube Downloader

A web app that allows users to download YouTube videos. Summer 2016 | http://quiet-coast-28179.herokuapp.com/

Created an app in Node.js that allows users to download YouTube Videos. It has two versions - one that works on terminal and a web app. The terminal app is written completely in Node.js and the web app in Express.js with handlebars templating engine.
